User Survey - Thales Ferreira [500514717]

Group #19:

Zhong Zheng - 20%

Danylo Dotsenko - 20%

Thales Ferreira - 20%

Mathew Mozaffari - 20%

Md Mijanur Mollah - 20%

Project Summary

After the teams were announced the entire group got in touch very quickly. A consensus on the platform that was being used for the report was reached. The project was decided through an online polling software [Poal.Me], the team and the client agreed on a Patient Monitoring system.
The team had no trouble with meeting or work distribution. The client still thinks the project is a bit simple, however the team agrees it is only the 1st iteration and has a solid structure.
